Global Aviation Solutions Announces New Operations Facility in Guntersville, Ala.

Huntsville, Ala. - Global Aviation Solutions is pleased to announce the selection of Guntersville Municipal Airport – Joe Starnes Field in Guntersville, Ala. as the site for its new aircraft maintenance and operations facility. The new facility will serve as the primary location for fixed and rotary wing aircraft modifications and upgrades. The operations facility will include multiple hangers and be built throughout two phases. Once the lease agreement is finalized with the City of Guntersville, construction will begin immediately. The first hanger is scheduled to be completed by early 2017 and could bring up to 50 jobs to the Marshall County/Guntersville community.

“Global Aviation Solutions is very pleased to build our new operations facility at the Guntersville Municipal Airport in Marshall County,” said Global Aviation Solutions President and CEO Darrell Kindley. “After a long ten months of evaluating different locations in Texas, Virginia and various sites across Alabama, the Guntersville site was selected based upon its location, new runway and space for additional growth. “

“It has been a pleasure working with the city of Guntersville and the Marshall County Economic Development Council in making this decision. Everyone involved worked very hard to ensure we selected Alabama and the Guntersville Municipal Airport to build our new facility,” Kindley said.

About Global Aviation Solutions

Global Aviation Solutions provides innovative and long-term avionic and airframe solutions to commercial and government aviation users worldwide. Global Aviation Solutions offers commercial and military off-the-shelf (COTS/MOTS) products for fixed and rotary wing aircraft that provide state-of-the-art system solutions to resolve avionics obsolescence and capability gaps. Our commercially developed and qualified business model offers customers the best value, quickest to market and lowest risk approach to upgrading existing fleets or inducting new aircraft into operation.
